

# KIBL Litepaper V0

## KennelKlub Arcade — Provably Fair Gaming on Nexa

---

KennelKlub is building the first provably fair blockchain arcade on Nexa. Our origins began with PixelPup, a mascot NFT project, and grew into a broader vision: a transparent, sustainable, and entertaining ecosystem of blockchain-based casino-style games powered by the KIBL token. KIBL is not a speculative meme coin — it is a utility token designed to power real games, fund sustainable development, and reward a growing community. With over 600 wallets already holding KIBL through faucets and alpha testing, distribution is wide and grassroots. Our mission is simple: fair play, transparency, and fun.

### Market Opportunity

The global online gambling market exceeded \$90 billion in 2023, with strong growth projected. Existing casinos are centralized and opaque, while blockchain casinos have struggled with high fees and poor adoption. Nexa's low fees and high throughput make it ideal for fast, micro-bet gaming, positioning KIBL as the first arcade token on Nexa.

### Competitive Landscape

Stake and Rollbit are highly successful, but centralized and fiat-integrated. Funfair was an early blockchain casino project but suffered from gas fees and poor adoption. Many DeFi casinos lack true transparency or sustainable tokenomics. KennelKlub is different: provable fairness, crypto-only betting, low fees, and grassroots distribution.

### Technology & Provable Fairness

KIBL games use a commit–reveal randomness protocol. The system generates a server seed, commits to it in advance, and reveals it after the game concludes. Players can independently verify that each hand or roll was predetermined and unaltered. This ensures outcomes are unbiased, transparent, and reproducible. No technical expertise is required — casual players simply play, while advanced users can verify results on-chain.

## Tokenomics

KIBL began with a community-first launch, distributing ~5% of supply through a faucet. This seeded over 630 unique wallets, making KIBL one of the most widely held grassroots tokens on Nexa from the start. No whales, no insider allocations — just fair play and wide distribution. From here forward, all allocations are disciplined with cliffs and vesting to ensure long-term sustainability.

Category	%	Tokens	Vesting	Notes
Private Sale	15%	149.85M	6m cliff → linear	Supporter round
DEX Liquidity	20%	199.8M	Immediate, tranche-locked	KIBL/NUSD liquidity provisioning
Treasury	25%	249.75M	12m cliff → 20% yearly	Dev, marketing, audits, grants
Community Rewards	15%	149.85M	3m cliff → 4+ yrs linear	Leaderboards & gameplay rewards
Faucet (distributed)	5%	49.95M	Circulating	Fair launch, 630+ wallets seeded
Team & Advisors	15%	149.85M	6m cliff → 3y linear	Retention & incentives
Partnerships & Growth	5%	49.95M	Flexible	Strategic collabs & ecosystem growth

## Utility & Monetization

KIBL is the currency of the KennelKlub Arcade, powering Poker, Blackjack, Dice, Roulette, Slots, and the future RPG. 50% of wagers are permanently burned, while 50% are allocated to the treasury. This ensures sustainable development while making KIBL deflationary over time. NFTs add gameplay perks and cosmetics, enhancing token stickiness.

## Community & Growth

600+ wallets already seeded via faucet, with 11 Alpha Tester NFT qualifiers. Growth strategy includes expanding Telegram/X presence, partnering within the Nexa ecosystem, running meme campaigns, and seasonal arcade leaderboards. These activities will strengthen community engagement and prepare for the private sale.

## Private Sale

Allocation: 15% (149.85M KIBL). Raise Target: TBD. Hard cap enforced by contract, with per-wallet max buy. Funds allocated: 50% liquidity, 30% development, 20% marketing. LP tokens locked in tranches (6m, 12m, 24m). Treasury controlled via multi-sig with public unlock schedule. Team tokens locked for 6m, vesting over 3 years.

# Roadmap

## Q4 2025 — Foundation & Compliance First

- Form Wyoming LLC for legal entity
- Explore Costa Rica & Palau offshore structures
- Finish Poker & Blackjack development to polished standard
- Add Dapp wallet integration (watch-only + signed transactions)

## Q1 2026 — Controlled Launch Preparation

- Private Sale (Supporter Round) with hard cap & per-wallet max
- Seed DEX Liquidity Pool (KIBL/USD) with tranche-locked LP tokens
- Release Dice Game (provably fair)
- Begin development on Roulette

## Q2 2026 — Expansion & Community Rewards

- Launch Roulette
- Continue licensing exploration (Palau, Costa Rica, Curaçao feasibility)
- Season 0: Community Rewards (leaderboards & achievement payouts)
- Release Alpha Tester NFT perks

## Q3 2026 — Betting Goes Live

- Enable KIBL Betting (crypto-only, Nexa→KIBL conversions)
- Poker full release (provably fair, single-player)
- Publish first security audit report
- Expand ecosystem partnerships within Nexa

## Q4 2026 — Multiplayer & Ecosystem Growth

- Multiplayer Poker beta (capped tables)
- Slots mini-game release
- Strengthen offshore compliance policies (AML-lite, responsible gaming)
- Expand international marketing campaigns

## 2027 — DAO Transition & Licensing Upgrade

- Begin DAO treasury governance prep
- Reveal KennelKlub RPG prototype

- Pursue Curaçao or higher-tier licensing if traction supports
- Season 1: Full KennelKlub Arcade launch

## Compliance & Risk Management

KennelKlub will incorporate in Palau for lean structure. Licensing upgrades (Curaçao, Isle of Man, Malta) will be pursued only when traction supports. Transparency-first: burns, faucet distribution, and treasury locks will be public. Risks include regulation (mitigated with offshore ops), adoption (mitigated by first-mover advantage), and development capacity (mitigated via treasury outsourcing).

## Long-Term Vision

KennelKlub aims to become the Web3 arcade ecosystem of Nexa. A hub of provably fair games, DAO-governed treasury, seasonal rewards, and NFT integrations. KIBL as the arcade currency of Nexa: deflationary, community-powered, and fun.

## Closing

KIBL is the first fair-play blockchain casino token on Nexa. With capped supply, grassroots distribution, transparent mechanics, and a sustainable treasury, KennelKlub is positioned for long-term growth. From Alpha Tester NFTs to multiplayer poker and RPG battles, KennelKlub is more than a game — it's a movement to bring fairness and fun back to blockchain gaming.
